FLUSH DOORS

Doors range of Flush Doors are kiln seasoned & chemically treated to make them dimensionally stable termite resistant, fungi free & weather proof. These doors have a solid block board wood filling usually with Pine or Meranti wood with cross bands (core) & face veneers which are PF bonded pressed in hot press with high temperature & pressure making them boiling water proof & stable.

High quality wooden flush doors are therefore in great demand among discerning architects, builders and contractors.

These same flush doors are used in making our laminated doors, primer coated doors, and membrane doors.
